Experience

Minecraft Server Developer

World Community

Remote   2021 – 2022

I was working as one of the developers who maintain the working flow of the Minecraft server in World Community. I implement and modify a feature to make it more enjoyable to play on the server.

Software Engineering Internship

CyberLabs

Bandung, Remote   2023 – 2024

Here I'm doing some internships as part of one of my vocational high school programs. I made a website using Laravel and also a mobile app using React-Native and Golang as the back-end, using MongoDB as the database, and with Redis for caching.

Founder and Core Management

Stegripe

Remote   2021 – Now

Stegripe is an online community that engages in a variety of internet activities. Its members are individuals with a high level of interest and enthusiasm in the digital world. We are involved in different activities, such as developing random projects on GitHub, creating content on TikTok and YouTube, and managing Minecraft servers.
